About Clearview

Clearview is the premier innovator of next-generation SharePoint-based Enterprise Content Management (ECM) solutions designed for today's demanding business world. Our leadership team combines years of experience with the latest Microsoft technology architecture and innovation to bring to market a new standard of excellence for ECM solutions, services, and Customer care.

ISV/Software Solutions
Information Worker Solutions
Data Management Solutions

"Clearview extends Microsoft® SharePoint® core content services with high-value, Enterprise Content Management (ECM) features that are elegantly integrated with the Microsoft technology platform. This next-generation ECM solution provides System Integrators, ECM Resellers, and Microsoft Partners with new services opportunities and consulting engagements in the ever-growing ECM market while solving operational, compliance and governance issues for their customers."

David Healey, Senior Product Manager
Microsoft SharePoint System Integrators

Clearview brings a fresh, new approach to Enterprise Content Management (ECM) with the Clearview Microsoft® SharePoint® based ECM suite. The first Company to introduce SharePoint-based ECM solutions into the market, Clearview's exceptional experience in the ECM industry has now been combined with the very latest advancements in Microsoft technology and architecture to bring to market a revolutionary solution that provides enterprise-class functionality, combined with intuitive user experiences, at a value point that is unprecedented in this market. We invite you to examine some of Clearview's unique features, capabilities, and architecture. We believe you'll very quickly see how Clearview is changing the way you see Enterprise Content Management.

- ⋮ As the world's first SharePoint-based ECM suite, Clearview uniquely encapsulates - not integrates - SharePoint's native ECM capabilities for document management, email management, web content management, and forms management. Clearview then extends SharePoint's functionality with high-volume transactional document imaging, report management (COLD), and advanced workflow (business process management) in a highly-scalable, enterprise-class ECM solution.
- ⋮ Clearview is a 100% contemporary ECM solution. Our product innovation leverages the latest in technology advancements such as .NET, XML, SQL Server™ 2005, SOA/Web Services, and Active Directory, to deliver rich, ECM functionality that fits within your Microsoft-based IT and desktop worker infrastructures with ease and simplicity.
- ⋮ Information workers are provided with highly-intuitive, content-centric desktop user experiences in either a traditional Windows-based client or via our new AJAX/ASP.NET based web client. These clients incorporate the new Office 2007 user experience via the context sensitive ribbon, along with other Outlook-type orientations to deliver a comprehensive Microsoft familiar experience across the desktop. For maximum adoption and return on your ECM investment, our interfaces provide end users with rich functionality combined with advanced personalization attributes that make content elements relevant and meaningful to each individual worker's job, function, or operational role in the enterprise.
- ⋮ The unique Clearview *Iriss* Desktop Gadget is the world's first ECM gadget (inspired by Microsoft Windows Vista™ gadgets). The *Iriss* connects content to business applications without integration, delivers an exciting and simplistic user experience, and is value-priced to enable every information worker in your enterprise to benefit and prosper from basic content services on their desktop.
- ⋮ Clearview's next-generation Virtual ECM domain brings content federation and aggregation services to the Microsoft platform to leverage existing investments you may have made in aging document or content solutions. Clearview's unified content services then deliver advanced information organization and tracking, security and audit logging, along with other high-value content services and policies across the domain.
